

JSOM Career Management Center Technical Resources Guide

These are examples of tools that can be used to highlight your technical skills and projects, which may be included in the header section of your resume. Note: We recommend removing the hyperlink from the URL on your resume. By using these tools, you maintain that the information is accurate and current.

<https://github.com>

GitHub is a website and cloud-based service that helps developers store and manage their code, as well as track and control changes to their code. This is a great tool to share open-source projects.

<https://stackoverflow.com>

Stack Overflow is an open community for anyone that codes. They help you get answers to your toughest coding questions, share knowledge with your coworkers in private, and find your next dream job.

<https://www.kaggle.com>

Kaggle offers a no-setup, customizable, Jupyter Notebooks environment. Access free GPUs and a huge repository of community published data & code.

<https://www.shinyapps.io/>

Shiny is an R package that makes it easy to build interactive web apps straight from R. Deploy your Shiny applications on the Web in minutes
