

Noor Al Rubaye

BS-ITS Student

Where are you from?

Baghdad, Iraq

How and why did you choose ITS at UTD?

Based on my interests and career aspirations, I chose to pursue the Information Technology & Systems major at the University of Texas at Dallas (UTD). I was attracted to this major as it combines both technology and business, which I believe are essential components in today's fast-paced and technologically advanced world.

Furthermore, UTD's Information Technology & Systems major offers a comprehensive curriculum that covers both technology and business courses, providing me with a well-rounded education and the opportunity to become an expert in both areas. Over the past year, I have had the opportunity to learn new concepts and skills from my classes, which has further solidified my decision to pursue this major at UTD as well recommending it to freshman students.

What are your future career goals?

My future career goals involve growing my career in Information Technology (IT) after graduation. I am interested in gaining experience in various IT fields such as IT project management and program analysis. My ultimate aspiration is to secure a leadership position in the IT industry.

In addition, I plan to pursue a Master's degree in Business Administration (MBA) to enhance my management and business-related skills. I believe that obtaining an MBA will help me achieve my long-term career goals and prepare me for future leadership roles in the IT industry.
